To assist in providing a safe and healthy work environment for employees, clients and students, SFM Services has established a workplace safety program. This program is a top priority for SFM. The Human Resources Department has the responsibility of implementing, administering, monitoring and evaluating the safety program. SFM provides information to employees about workplace safety and health issues through regular internal communications channels such as supervisor-employee meetings, bulletin board postings, memos or other written communications.

Employees and supervisors receive periodic workplace safety training. The training covers potential safety and health hazards and safe workplace practices and procedures to eliminate or minimize hazards.

Each employee is expected to obey safety rules and exercise caution in all work activities. Employees must immediately report any unsafe condition to the appropriate supervisor. Employees who violate safety standards, who cause hazardous or dangerous situations, or who fail to report, or, where appropriate, remedy such situations, may be subject to disciplinary action up to and including termination of employment.

In the last 5 years, SFM has had two citations from the U.S. Department of Labor Occupational Safety and Health Administration. Both citations were to a tree trimming crew for not wearing a protective helmet and the other for not wearing a body belt attached to the boom. Both were corrected during the inspection and addressed in safety training.
