Analysis:

Within the same shopping center there are three other businesses that serve alcoholic beverages and are exempted by Code from the distance separation requirement and therefore do not require approval as a special exception (Conditional Use) at a public hearing. Cami's Seafood Restaurant and Ken and Mike's Italian Restaurant are exempted by the code from the distance separation requirement because they are full service restaurants. The existing convenience store does not have to comply with the 2,500' required separation because the code exempts take-out alcoholic beverage sales at grocery stores from the distance separation requirements.

For this section, the code defines a restaurant as an establishment that serves cooked, full course meals prepared daily on the premises. Since Bodegon El Pimiento will only serve Tapas, which are considered appetizers, and will not have a full kitchen, it will not qualify as a restaurant and must conform to the 2,500 ft distance separation.

Although a grocery store is not defined in the Code, the adjoining convenience store is considered a grocery store by a long standing administrative interpretation by the County Planning Director which states that a grocery store is an establishment that sells more than 150 different food items. It is not anticipated that Bodegon El Pimiento will sell more than 150 different food items and therefore will not qualify as a grocery store.

It should be noted that the required distance separations are measured in a straight line and the line in this case crosses over a canal. The actual walking distances to the church and school would be a few hundred feet longer. Also the distance to the school is measured to the play area immediately across the canal and not to the building itself which is more than 1,000 ft farther away.

Knowing that the proposed location did not meet the required distance separation, the applicant could have looked elsewhere for a location; however, there are difficulties in locating this type of business anywhere in Miami Lakes with the distance requirements from schools and churches in the current code.

Miami Lakes was designed in a very innovative manner which combines different uses throughout the Town. Commercial areas are situated throughout the town next to residential uses and in some cases combined into mixed residential and commercial centers. The schools and churches are also conveniently spread out through the Town. The 2,500 ft. required distance separation, which is almost ½ mile, did not contemplate this type of town layout and practically eliminates most existing commercial locations from allowing a business such as the Bodegon El Pimiento.

The 685' requested distance separation from the school complies with state statutes. Chapter 562.45 (2) (a) of the Florida Statutes specifically states: ... "a location for on-premise consumption of alcoholic beverages may not be located within 500 feet of the real property that comprises a public or private elementary school, middle school or secondary school unless the county or municipality approves the location ..."

The proposed use is compatible with the existing uses; with the exception of the distance separation complies with the land development regulations; is consistent with the Comprehensive Plan; will not overburden the existing infrastructure and does not generate any hazardous wastes.

Given the fact that there are three other establishments serving alcoholic beverages in the Windmill Gate Shopping Center, that there is a canal separating the school and church property from the commercial establishment and that the current alcoholic beverage distance separation regulations need to be re-examined, staff recommends approval of the Conditional Use request with conditions.

Recommendation:

Staff recommends approval of the conditional use request to allow alcoholic beverage sales on the subject property within 2,500' of a school and church with the following conditions:

1. No liquor shall be sold or consumed on the premises. Wine may only be consumed within the store or sold in sealed bottles for takeout to be consumed off the property.
2. There shall be no dancing or entertainment other than background music (music that does not interfere with normal conversations) within the premises.
3. The applicant shall record the Resolution in the public records of the Clerk of the Circuit and County Court and shall return the original order to the Town Clerk before the Town grants approval of the alcoholic beverage license.
4. The applicant shall obtain a certificate of use and a Town occupational license within one year of the date of this approval. If a certificate of use and a Town occupational license is not obtained or an extension granted within the prescribed time limit then this approval shall become null and void.
